Downloading Riverpoint Writer for Windows Transcript

Speakers: Host

HOST: To download Riverpoint Writer for PC, you'll first need to check the compatibility table located on the Riverpoint Writer page. It mirrors the student hardware/software agreement so you'll see the minimum operating system and Microsoft Office version requirements. If you're still unsure, you can click the check my operating system button on the Riverpoint Writer page.

To begin downloading, click the download button for your system type. Follow the prompts to save the zip file to your computer and open the downloaded file that appears in the lower left corner of your screen.

Double click to run the EXE file. Click yes to install Riverpoint Writer. When the wizard appears, click next. Accept the terms of the agreement and click next again. You can allow for the default destination folder or browse for a folder that is more suitable for your needs.

When you're satisfied, click next and then click next one more time to have the wizard start copying files over to your computer. Once the install is complete, click finish. Review the read me and then click close. The shortcut icon should automatically appear on your desktop.

You are now ready to use Riverpoint Writer. In the next video, you'll learn how to create a new document.
